MEET

MEGAN BENAGE

Megan Benage is an Ecologist working in Minnesota. Her work focuses on partnerships, prairie conservation and restoration, rare species and habitat conservation, and working with industry to find sustainable solutions and achieve balance across the landscape. She strongly believes in educating and connecting with people to learn from one another and share the love of prairies, wetlands, and other wildlands.

Megan holds a Bachelor of Science in Wildlife Science and a Master of Science in Restoration Ecology from Purdue University. She has authored several publications on the benefits of soil health, An Indiana Landowner's Guide to Native Plants, prairie restoration, and many prairie articles highlighting her love of the land. She also has previously written a column for the Sustainable Farming Association in a blog titled "Beyond your Backyard" and hosted the Prairie Pod podcast for the Minnesota DNR.
